## INTRODUCTION

Hi,

Have you ever met a sarcastic philosophical graphic designer? If you have I'm eager meet that designer! Well if you haven't then here is your chance to meet one!

I'm that guy that uses way to many movie quotes, proverbs and expressions in almost every conversation. I also happen to have an imagination that runs wild from time to time. When it does I tend to change conversations into deep philosophical debates about whether the egg or chicken came first.

My interests are as wide as the color spectrum. I guess it comes from my desire to learn, and my curious nature. Whether it's space or the ace of spades, earth or planet dirt, history or mystery, technology or philosophy; count me in!
